ReactJS

NodeJS

Asp.net C#

NoSQL

UI/UX Design

EXPERIENCE

2015 - Present

Co-Founder, CreditSolution

Built a custom web-based accounting software for Credit Unions. Currently trusted by 7 institutions, handling over 1k daily requests. Used for recording daily cash collections, cash payments, creating/editing new accounts, generating transaction reports, etc. Built software primarily with Asp.net C#, Crystal reports for generating dynamic reports, and jQuery EasyUI library for displaying datagrids.

Asp.net C#

July 2018 - March 2019

Full-stack developer, The R-Squared Project

Worked with a team to develop website's front and back-end architecture. Responsible for:

- designing UI/UX layouts, building the web pages with the team, and reviewing code
- finding the most cost-effective cloud services (Google Firebase)
- deploying project through Content Delivery Networks (CloudFlare)
- cleaning and formatting raw data into JSON format for use in REST API with MongoDB database and NodeJS server
- planning for the most efficient and scalable end product

DevOps

Firebase

June 2019

Moneymanager

Built a full-stack web application for recording and monitoring personal daily finances: <https://moneymanager.gq>

Primary technologies used:

- Node.js with Firebase Cloud functions for the back-end
 - Cloud Firestore for database
 - ReactJS for front-end interface
- (FERN stack : Google Firebase, express, react and node.js)

Google Firebase

NodeJS

ReactJS

NoSQL (Firestore)
