SKILLS

JavaScript Typescript VueJS ReactJS NodeJS Asp.net C# NoSQL MS SQL Google Cloud Platform Java UI/UX

EXPERIENCE

● May 2020 - August 2020

Tools Programmer intern, Ubisoft Montreal

Member of TG Atlas, a team responsible for building custom mapping software for company-wide use.

- Designed and built the website user interface for one of the most requested features of Atlas: map export.
- Increased efficiency of a proprietary feature ordering algorithm by ~30%, enhancing UI responsiveness.
- Boosted code coverage by a cumulative 6.43% with **Jest** unit tests, building a more reliable and maintainable codebase.
- Enforced guidelines for formatting/linting and fixed 700+ existing errors, producing more consistent code across entire project.
- Created documentation for developers and presented code walkthrough webinars for on-boarding of new members in the team.
- Hosted presentations with the team for showcasing new features and capabilities to Management.

VueJS Typescript Vuetify UI/UX

● June 2020 - Present

Trackgit <https://trackgit.com>

Designed and built a full-stack web application for GitHub repository analytics.

Built on a 100% serverless infrastructure in Firebase, the application helps track visitor analytics for any and all GitHub repositories.

VueJS Typescript NodeJS Stripe API Google Firebase UI/UX

● June 2019

Moneymanager github.com/Shanzid01/MoneyManager

Built a MERN stack web application for recording and monitoring personal daily finances: <https://moneymanager.gq>

ReactJS JavaScript NodeJS ChartsJS Google Firebase UI/UX

● July 2018 - March 2019

Full-stack web developer, The R-Squared Project github.com/TheRSquaredProject/official-website

Worked with a team to plan, design and develop the official website. Responsible for creating layout prototypes, constructing web pages, reviewing code, cleaning and formatting raw data into JSON, and setting up cloud infrastructure in Google Firebase.

HTML5 CSS JavaScript NodeJS Google Firebase UI/UX

● May 2015 - Present

Web developer, CreditSolution

Built a custom web-based accounting software for Credit Unions. Currently trusted by 7 institutions, handling over 1k daily requests.

Used for recording daily cash collections, cash payments, creating/editing new accounts, generating transaction reports, etc.

Built interface primarily with Asp.net C#, Crystal reports for generating dynamic reports, and jQuery EasyUI for displaying datagrids.

Asp.net C# MS SQL
